EXPERIENCE

Intern

October 2010 – Current

Chumby Industries, San Diego, California

Worked remotely with a designer to develop a Flash based casual game called Streamline for the Chumby device's newest operating system. Used Flash to design and develop an efficient, user friendly, simple and fun game on a brand new platform. Worked on site in San Diego creating applications and debugging for TV, Android and Chumby devices.

Developer

May 2010 – March 2011

Web Movement LLC, Stevens Point, Wisconsin

Assist in programming projects for clients in a variety of languages, including ActionScript 3, PHP and ASP.NET. Use client feedback to improve and change previous projects. While working with Web Movement, I helped to create a new XML based image gallery with many different ways of navigating and viewing photos.

Image Slider can be seen at: <http://dev.sundaydrivestudios.com/slideshow/index.html>

Workstation Support

May 2010 – January 2011

University of Wisconsin – Stevens Point

Build, manage and troubleshoot university computers. Serve as end point support on computer-related issues, ranging from how to use a program to replacing faulty hardware or software. Kept current with using, fixing, and upgrading technologies and software for Macintosh OSX, Windows XP, and Windows 7 based systems.

Computer Guide Tutor

September 2008 – June 2011

Tutoring-Learning Center, University of Wisconsin – Stevens Point

Work independently and as part of a team to tutor students in computer related skills. Communicate and teach new technologies to students with varying knowledge of computers and technology. Run weekly tutoring sessions with students for advanced programming classes.

EDUCATION

Web & Digital Media Development, Bachelor of Science September 2006 – May 2011

Computer Information Systems
